PROFESSIONAL EXPERIENCE

Software Developer

HBITS, Pune (November 2021 – Present)

- Developed web applications using C#, Dapper ORM, and SQL, adhering to the MVC architectural pattern.

- Designed and implemented RESTful APIs for enhanced system integration and functionality.

- Developed utilities to monitor system performance and health.

- Collaborated with the Product Team to develop robust software solutions and worked with the Production Support Team to resolve client issues based on ticket priority.

Jr. Software Developer

Lucreskill Tech, Pune (February 2021 – September 2021)

- Built and enhanced web applications using C#, ADO.NET, and SQL, following the MVC architectural pattern.

- Acquired foundational expertise in software development and web application deployment.

PROJECTS

Calmanac
- Developed modules such as Dashboards, Patients, Contracts, Provider, Scheduler, and Admin.
- Designed scheduling and rendering features for seamless appointment operations.
- Built a detailed Reports module for generating accurate, module-specific reports.
- Enabled cross-platform functionality, including Android/iOS app support.
- Integrated data merging capabilities for seamless interaction with other web applications.

ConCred
- Added advanced modules including Billing and Collection.
- Managed comprehensive data for Patients, Funding Providers, and Therapy Providers.
- Implemented robust access control for module security.
- Supported multiple reporting formats for in-depth service analysis.
- Developed a cross-platform application compatible with Android/iOS devices.

Reward Points Management System (RPMS)
- Automated precise calculations for therapist reward points.
- Designed role-based dashboards for Admin and Employees.
- Enhanced management of individual therapist's reward data.
